Profile

I am a CS major interested in using technology to make impacts on society. As an avid programmer, I am accustomed to coding in different languages, leveraging various libraries and services, and participating in an agile workflow. I look forward to learning and developing new skills and technologies on the job.

Professional Experience

01/2017 - 06/2020

Game Developer

Sticky Rice Games

- Creating Android ports of PC games in Unity, often working within the constraints of the source code. Various localization and UI adjustments are often required.
- Integrating various platform features to the end product, such as GPG and Steamworks.
- Performing quality assurance before launching product and reporting bugs to the associated developer.

Education

2020 - Present
