Professional Experience

01/2017 - 06/2020

Game Developer

Sticky Rice Games | Toronto, ON

- Created Android ports of PC games in Unity, often worked within the constraints of the source code to ensure stability.
- Integrated various platform features to the end product, such as GPG and Steamworks.
- Performed quality assurance testing before launching products and reported bugs to the associated developer.

Projects

09/2020

RGBIF

Python, Pgmagick, Tkinter

- Utilized pgmagick to apply filters to each frame of images or gifs to create gifs with rgb effects.

08/2021

Nomination Site

HTML, CSS, JS, React, Redux, React-Bootstrap, Express, Python, AWS

- Allowed users to search and share their favorite entertainments via an image generated from an AWS Lambda call.

08/2021

Portfolio Site

HTML, CSS, JS, React, Redux, Material UI, Express, MongoDB

- A responsive portfolio site built and stylized with React and Material UI. It also includes a backend for form submission.
